(CONTAINER MODIFICATION HAS NEVER BEEN EASIER)

ConEX+RA brackets and pipe racks allow you to maximize the usable space inside your shipping container quickly and easily. The brackets and racks provide immense shelf space and rigid stock storage without interfering with valuable floor space. Our brackets and racks pay for themselves in labour saving the first time they are used. Think of the savings achieved when they are used over and over again.

Simple Assembly

1

HANG BRACKETS

Insert shelving bracket hangers into container's D-Ring

2

INSERT STABILIZERS

Insert stabilizer member into the stabilizer receiver.

3

INSTALL SHELF BOARDS

Take two same size boards and line them up with each other. Place them side-by-side evenly across the braces. Form an upside down V with the boards then press into place. This locks the boards into their shelf bracket.

32XX Series:

Pipe Rack Series:

PRODUCT DESCRIPTIONS

32XX Series: *Our original product design that provides varied shelf heights to accommodate a wide variety of items. This series will allow items as large as 32" tall to be stored on the floor under the shelves (height varies depending on D-Ring configuration).*

A. 3210 Shelf Bracket

A three shelf unit that uses 2 - 2 x 10 pieces of construction grade material per shelf. This results in a shelf that is 18 1/2" deep. The load rating is 550 lbs per bracket arm and 1100 lbs per bracket. Two brackets means you have 2200 lb shelves.

B. 3212 Shelf Bracket

A three shelf unit that uses 2 - 2 x 12 pieces of construction grade material per shelf. This results in a shelf that is 22 1/2" deep. The load rating is 500 lbs per bracket arm and 1000 lbs per bracket. Two brackets means you have 2000 lb shelves.

Pipe Rack Series: *Original conceived to assist in the organization of electrical conduit, these units are being used by Mechanical Contractors, General Contractors, Fire Suppression Contractors and more. With the addition of our exterior hook accessory you can set up your pipe racks outside of your shipping container, further expanding the usefulness of your storage space.*

C. 4000C Pipe Rack

Provides four support arms mounted at 30 degrees to enhance volume capabilities. Each support arm is gusseted for added strength and includes a roll stop to enhance safety within your containers. Provides 24 inches of open floor space below for storage of large, heavy items.

D. 5000C Pipe Rack

Provides five support arms mounted at 30 degrees to enhance volume capabilities. Each support arm is gusseted for added strength and includes a roll stop to enhance safety within your containers. This bracket makes the most efficient use of wall space for storage of rigid long stock. This unit provides 8 inches of open floor space.
